PROFESSIONAL SUMMARY

Junior Full-Stack Developer with hands-on experience building web applications using React, Next.js, TypeScript, Python, and FastAPI. Skilled in developing responsive user interfaces, building RESTful APIs, integrating frontend and backend services, and managing relational databases with PostgreSQL. Experienced in applying software engineering concepts through practical projects involving logistics, e-commerce, fleet management, and workflow applications. Familiar with authentication, role-based access control, Docker, Redis, database migrations, and automated testing. Strong problem-solving abilities, a commitment to continuous learning, and an interest in building secure, scalable, and maintainable software.

TECHNICAL SKILLS

Programming Languages:	Python, JavaScript, TypeScript, SQL
Frontend:	React, Next.js, HTML5, CSS3, Tailwind CSS, DaisyUI, Responsive Web Design
Backend:	FastAPI, RESTful APIs, Pydantic, SQLModel, SQLAlchemy
Databases & Caching:	PostgreSQL, Redis, Relational Database Design, SQL Queries
Authentication & Security:	JWT, Argon2, Role-Based Access Control (RBAC)
Testing & Code Quality:	Pytest, API Testing, Ruff, ESLint, Debugging
DevOps & Tools:	Git, GitHub, Docker, Docker Compose, GitHub Actions, Linux, Alembic
Engineering Practices:	API Integration, Modular Architecture, Database Migrations, Version Control, Collaborative Development

PROJECTS

RouteBridge Logistics — Multi-Tenant Logistics Platform

Technologies: Python, FastAPI, React, Next.js, TypeScript, SQLModel, PostgreSQL, Docker | **Status:** Live Demo

A logistics management platform designed to connect merchants, customers, and delivery partners through a unified system for managing shops, orders, and delivery operations.
Live Application: routebridge-web.onrender.com | **Source Code:** GitHub Repository

- Developed responsive user interfaces using React, Next.js, and TypeScript.
- Built backend API functionality using Python and FastAPI.
- Designed and managed relational application data using PostgreSQL and SQLModel.
- Implemented role-based access control and organised application services using a modular architecture.

CheapMarket — Online Grocery Shopping & Delivery Platform

Technologies: Next.js, React, TypeScript, Tailwind CSS, Python, FastAPI, PostgreSQL, Redis, Docker | **Status:** In Development

An e-commerce platform being developed for the Nigerian market, enabling customers to purchase groceries and household products, manage orders, and arrange home deliveries.

- Developing responsive shopping interfaces and product browsing experiences using Next.js, React, and TypeScript.
- Building backend APIs using Python and FastAPI.
- Working with PostgreSQL, SQLModel, and Alembic for data modelling and database migrations.
- Developing shopping, order management, payment-processing, and delivery workflows, with Redis for caching and rate limiting.

GhostWork — Workflow Automation Platform

Technologies: Next.js, React, TypeScript, Python, FastAPI, SQLModel, PostgreSQL, Redis, Celery, JWT | **Status:** In Development

A full-stack application being developed to support workflow automation and structured application processes.

- Developing frontend components using Next.js, React, and TypeScript.
- Building backend services using Python and FastAPI, with SQLModel and PostgreSQL for data management.
- Working with Redis and Celery for background task-processing capabilities and JWT-based authentication.

FleetPulse — Fleet Management & Vehicle-Tracking SaaS

Technologies: Next.js, React, TypeScript, Python, FastAPI, PostgreSQL, Redis | **Status:** In Development

A fleet management platform being developed for logistics companies to monitor vehicles, manage fleet operations, and coordinate transportation activities.

- Developing frontend and backend application components using React, Next.js, TypeScript, and FastAPI.
- Working on application architecture, backend data models, and API functionality.
- Using PostgreSQL for relational data management and incorporating Redis into the application infrastructure.

EchoVault Nexus — Knowledge & Project Intelligence Platform

Technologies: Python, FastAPI, Next.js, React, TypeScript, PostgreSQL | **Status:** In Development

A knowledge management platform being developed to organise project notes, information, and decisions in a structured environment.

- Establishing backend application foundations using Python and FastAPI.
- Working on database models and developing the frontend using Next.js, React, and TypeScript.

TECHNICAL TRAINING

Africa Plan Foundation (APF) — Software Engineering Trainee | Ongoing

- Developing practical software engineering skills through structured technical training and hands-on projects.
- Building full-stack applications using React, Next.js, TypeScript, Python, and FastAPI.
- Practising RESTful API development, database design, authentication, testing, and application security.
- Using Git and GitHub for version control and collaborative software development.

PROFESSIONAL EXPERIENCE

National Youth Service Corps (NYSC) — Mathematics Teacher & Head of Corps Members

Akwa Ibom, Nigeria | November 2022 – November 2023

- Delivered Mathematics lessons, simplifying technical concepts and developing students' problem-solving abilities.
- Coordinated fellow corps members, demonstrating communication, teamwork, and organisational skills.
- Served as Head of Corps Members, supporting team coordination and administrative responsibilities.

Astroy Construction Company — Site Management

Imo State, Nigeria | May 2019 – December 2021

- Supported construction project coordination, building design reviews, and preparation of Bills of Quantities (BOQs).
- Assisted with project planning and technical documentation, applying analytical thinking and attention to detail.
- Collaborated with colleagues to resolve project challenges and support operational objectives.

EDUCATION

Enugu State University of Science and Technology (ESUT)

Bachelor's Degree in Building Technology | 2016–2021

LANGUAGES

English: Proficient | **Igbo:** Native
